The focus of the workshop will be on facilitating school leaders in meeting the demands of 21st century skills for learners and devising authentic plans for change in their own schools.

## Overview

If there is one factor that distinguishes successful 21st century schools, it is strong leadership. Effective principals have the vision, courage, wisdom, and professional knowledge to lead learning communities that create opportunities for all children to achieve their highest potential. While individual teachers can adopt the practices of a 21st century classroom, the real impact on students is if an entire school and works toward the same vision. School leaders need to be skilled in knowing when this needs to happen, and have the courage to do so.
