Instructor Profile
anoosha.shahid@gmail.com
Anoosha Shahid holds a Bachelor’s degree in Computer Science from IBA and is currently pursuing her Masters from IBA. Having two years of corporate experience at ICI Pakistan Limited, where she worked as a Microsoft SharePoint Consultant, she has profound knowledge of this web technology.

Also to her credit are two Microsoft Certifications in SharePoint Designer 2010 and SharePoint Business Intelligence 2010. With first hand learning from the market itself, she is extremely well versed with the subject. Anoosha with her strong background will be able to deliver more than just the academic curriculum requires as she shall relate concepts to real world situations, making the course more comprehensive.

Course Description:
This course will create awareness for students on one of Microsoft’s latest technology, SharePoint. Microsoft SharePoint is a web application framework and platform developed by Microsoft. First launched in 2001, Microsoft SharePoint integrates intranet, content management and document management, but recent versions have had broader capabilities.

Microsoft SharePoint 2013 comprises a multipurpose set of Web technologies, with a very strong Graphical User Interface (GUI) backed by a common technical infrastructure. By default, Microsoft SharePoint 2013 has a Microsoft Office-like interface, and it is closely integrated with the Office suite. The web tools are designed to be usable by non-technical users. Microsoft SharePoint can be used to provide intranet portals, document & file management, collaboration, social networks, extranets, websites, enterprise search, and business intelligence. It also has system integration, process integration, and workflow automation capabilities.

Learning Outcomes:
At the end of the course student will be able to:

- Integrate various Microsoft technologies under one platform
- Share their work and work with others, organize their projects and teams and discover people and information
- Develop their own Microsoft SharePoint 2013 based intranet portals
- Develop document management libraries, sites and workflows
- Get an idea about workflow management and business intelligence
- Understand the business use of Microsoft SharePoint 2013

Introduction to Microsoft SharePoint 2013
**Teaching Methodology:**
This course will include both theory as well as practical work. All concepts learned in class will allow students to develop their own Microsoft SharePoint 2013 web portal and integrate all concepts and technologies within. Students will work individually and as teams. Mini competitions will be conducted so as to test the knowledge and to test the creative skills of students.

**Course Duration:**
4 weeks with 3 (2 hours) classes per week, IBA City Campus.
Dates: July 1, 2014 – August 1, 2014
Days: Tuesday, Wednesday and Thursday
Timings: 1-3pm
